SUBJECT: Good News. We are getting it back.

Piece by piece, one Judge, then some more, a bunch of police and sheriffs, some US Senators, others in Congress, and State by State, County by County. One mainstream news media outlet, and then another are telling the truth. Meanwhile, ratings are plummeting for regular **NBC, CBS, ABC, CNN**, etc. news, while alternative news consistently picks up listeners and watchers.

It is all coming back, the real America that is.

Now, this just in.

THE SOUTHERN POVERTY LAW CENTER (SPLC) a cancer to our system, has been discarded by the **FBI**. That means police all over the **US** are getting the hint not to listen to them. Does that mean the old **FBI**, the one we could trust, is coming back? I sure hope so.

There are good people inside the system. More are coming forth every day, and they are standing up to the tyrants.

But that does not mean we should be completely trusting of the system. It's not all back to normal yet.

More on police and sheriffs, and the documented lies they hear from the Federal Government...
