Subject: **Deadly Technology**

Years ago, I was communicating with people in Europe who were trying to stop a pandemic all over the world. They wanted to stop the senseless murder of many millions of people.

Tireless people, from all over the world, worked to save us all.

Some, in Europe, advised activities for people to work with in the United States. I brought up to them the idea of contacting Sheriffs throughout the US. Then methods were devised in Europe, for the United States, to convince Sheriffs to agree not to allow mandatory vaccinations in their counties.

In the end, godly power took over and the pandemic was stopped before a need for Sheriffs to help. People with governments that threatened to throw them in jail, refused vaccines.

Now we have the proposition of widespread 5G technology to be installed all over the world. This is worse than any pandemic could have been. It is **potentially catastrophic**.

-

The Facebook Huerfano County Bulletin Board has a discussion about 5G, and I am part of it. Please look at it. Facebook.com / groups / huerfano

The county commissioners should be alerted about this, and urged to do the research. No-one should rely upon one so-called expert or industry sponsored so-called science. The commissioners must do the research, and do so properly. If they have not learned how to do it correctly, then they need to. Science is corrupted, just like law. Years ago, 2 of the present commissioners went to the State Attorney General about a matter of law, as if what he told them must be the truth.

The old cell phone technology dangers have prompted much research all over the world. There is some research accomplished already, about the new 5G technology, but there is far more real science with the old because of the length of time that it has been in use.

If you take the old technology findings, and you add 2 factors, you can see that the old technology was dangerous, and the new 5G is **potentially catastrophic**. The two factors are the huge increase in frequency, and the additional number of installed antennas. This affects everyone's health and mental stability, not just users of the technology.

One could be installed outside the house you live in.
