Subject: "Black Lives Matter" calling for murder of police – UN Forces to Invade

www.breitbart.com

Black Lives Matter activists chant 'pigs in a blanket' after cop murder.

They called for the deaths of police officers. **They had a police escort.**

They should have been arrested. This is incitement. Not all speech is protected by the first amendment.

In my opinion, they are being protected from prosecution to further New World Order "divide and conquer" aims. "Black lives matter" is funded by George Soros, a New World Order insider.

UN Military Forces are now prepared to invade the United States

Secretary of State, John Kerry, signed away America's freedom, security and longevity by putting his name on the UN Smalls Arms Treaty in violation of the Constitution which states that any treaty must be approved by the Senate on a two-thirds vote.

Humvee vehicles spotted in a Texas Walmart. Additionally, UN vehicles have been photographed as they are being shipped into Texas.

The American Military is being systematically disarmed.

March 27, 2015 Ft. Lauderdale there was a Special Operations Forces dissident extraction drill – and there is video.

There is a continuing and increasing foreign troop presence in America.

This statue is in front of the UN building. It depicts the UN agenda of civilian disarmament. The UN has been instrumental in disarming other nations.
