Subject: Drugs

Congratulations on winning the recent election. Congratulations on the recent drug arrest involving heroin. It is always a benefit to the people, when you eliminate hard drug sources.

However, the sources are not the main problem in our country. The demand is. Once the demand is eliminated, the sources will dry up.

How did we get this demand? You might consider these two facts. Aldous Huxley, a **NEW WORLD ORDER** insider, said that drugs would be a main factor in gaining control of the people. Many years later, he's been proven right from both legal, and illegal drugs. Also, the **US GOVERNMENT IS LARGELY RESPONSIBLE FOR ILLICIT DRUG TRADE** in the US. They ship in, and sell the drugs. That is a proven fact. Also, the **US Government** is largely under the control of **THE NEW WORLD ORDER**.

Media, and so-called "education" are largely responsible for the demand for drugs in the US.

Whatever your role in eliminating the drugs, to be truly effective you must understand the big picture of why we have this problem.

How do you eliminate demand? You help bring about rehabilitation programs that work from the perspective of **COMPLETE EDUCATION** about how we, in the **US**, got into this mess. The only way out is through a complete understanding.

The psyche of the American public has, in large part, been degraded. Education is inadequate, bringing forth children who have no idea what American history is about, or who cannot do simple math, and cannot read reasonably well. It also brings forth hopelessness, and helplessness, which leads to drug addiction. On the college level, huge lies are told about how there are supposedly too many people on the earth, leading to even further feelings of inadequacy, and unworthiness. So, this brainwashing must be countered in any effective rehabilitation program.

Face it. Eliminate one source of drugs, and another pops up, or people travel elsewhere to find what they want.

We must eliminate the demand.
