Subject: Refugee crisis

Events around the world are extremely complicated. For the most recent pertinent news, go to the We Are Change site (above), and click to the facebook link on the first page.

These events are probably going to affect Huerfano County. Many governors around the US have voiced objections, and refusals, regarding the influx of refugees into their state. There is a great deal of argument against the influx of refugees in congress, and it's obviously unsafe for the people of this country. The news I mentioned above will show the type of assault that came upon the people of Europe, from the refugees.

One of my concerns is that anti Muslim hype could cause a great deal of irrational fear amongst the people in the US. I believe there should be some kind of public relations between the Sheriff's department to discuss this with the people. Just because a person has darker skin, and is Muslim, does not mean they are a terrorist. There may be some Muslims wandering into Huerfano County, with no evil intention at all. I would expect some may be trying to escape the terrorists, and probably be getting some type of financial aid from the government. In my opinion, the terrorists amongst the refugees will probably not immediately go to an area where there are a lot of firearms. From the news I've seen, they favor very highly populated areas, with gun control, to do their evil deeds.

Around the world, it's getting very complicated. The New World Order's strategies are becoming more muddled, and more complicated, lately.

Just remember:

thesis antithesis synthesis order out of chaos

PROBLEM

REACTION

SOLUTION

With a knowledge of that formula, as you look at the news, you can see the underlying reality.

1. The Extremists in the middle east have been funded and trained by the US. This fact is proven.
2. The mainstream press lies about Russia. Ukraine was never invaded by Russia. The US placed a government that was not legitimate in Ukraine. The people of Crimea decided to cede to Russia.
3. Syria invited Russia to aid them against the terrorists. The US forces are there illegally.
4. The deliberate placing of terrorists in Europe, and in the US, is to destabilize the populations. In the US it is probably to be used as an excuse for martial law, and a complete takeover.
