Subject: Illegals spreading disease in the US

In addition to people with the Ebola Virus being taken to Atlanta GA from Africa, illegals are pouring over the southern border with deadly diseases. Border patrol are getting sick, and bringing the diseases back to their families.

My concern is that because illegals are being given bus tickets to go anywhere they want in the US, even those with diseases, we cannot assume that some of the families of those illegals are not in Huerfano County.

If any of your deputies finds it necessary to arrest these people, I'd hope they would do it with rubber gloves, and perhaps some types of masks. Then, please get them out of the area.

Obama recently signed an executive order, that any American with a certain type ailment can be detained. This leads to the speculation, by many, that because this order coincided with allowing people with Ebola into the US, and that there is massive illegal import of diseased adults, the purpose would be for a martial law takeover after a health emergency is declared in the US, with massive gun confiscation - and severe travel restrictions - for many innocent citizens all over the country.

[http://www.oig.dhs.gov/assets/Mgmt/2014/Over\\_Un\\_Ali\\_Chil.pdf](http://www.oig.dhs.gov/assets/Mgmt/2014/Over_Un_Ali_Chil.pdf)

The above is the **DEPARTMENT OF HOMELAND SECURITY** website. Here is what is written:

*DHS employees reported exposure to communicable diseases and becoming sick on duty. For example, during a recent site visit to the Del Rio USBP Station and Del Rio Port of Entry, CBP personnel reported contracting scabies, lice, and chicken pox. Two CBP Officers reported that their children were diagnosed with chicken pox within days of the CBP Officers' contact with a UAC who had chicken pox. In addition, USBP personnel at the Clint Station and Santa Teresa Station reported that they were potentially exposed to tuberculosis.*

So, what I'm asking you, for the safety of all the people in Huerfano County, is that you do all in your power to be sure we do not wind up with a massively diseased population in Huerfano County.
